REASONS FOR ALLOWANCE

1. Claims 1-15 and 18-20 are allowed.

The following is an examiner's statement of reasons for allowance:

- With regard to independent claim 1, as a reference of record, Ando et al (US 4,831,472) shows a storage medium load and unload apparatus for diverting a storage medium insertion impact force, comprising: a shuttle having a first pin with a first radius extending from a side surface of the shuttle and a protrusion having a posterior edge extending from the side surface, wherein the posterior edge is displaced a first distance from a center of the first pin; and a fixed side plate having a flange with a vertical edge and a first slot with which the first pin is engaged has an anterior edge and a curved posterior edge with a first width between the anterior edge and the curved posterior edge, wherein the vertical edge of the flange is displaced a second distance from the anterior edge of the first slot; **but fails to show** that the first slot has a curved posterior edge, and wherein a sum of the first width and the second distance is greater than the sum of the first distance and the first radius.
- Applicant asserts: in this invention "A protrusion extending from a shuttle side surface is positioned to impact a flange of a fixed side plate of the apparatus such that the impact force resulting from insertion of a storage medium into the shuttle is conveyed to the protrusion and the flange (Specification, p. 19).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
